== Attendees ==

Fukuchi San
Mark Gisi
Kate Stewart
Nathan Kumagai
Gary O'Neall
Shane Coughlan
Takemi San
Yamaoka San
Imada San
Chris Ekren

== Project Updates ==

Shane noted the following:
 - British National Health Service is gearing up for conformance and case study
 - OpenChain Curriculum slides are available in Simplified Chinese
 - OpenChain takes center stage with Linaro Connect Keynote in Hong Kong

== Specification ==

Mark opened by noting The OpenChain Specification version 1.2 is nearly ready.

He further noted that everyone is invited to make their voice heard before we conclude public comments on the 15th of April. You can review the latest draft of the OpenChain Specification – and see what has changed on page 3 – by heading to this link: https://wiki.linuxfoundation.org/_media/openchain/openchainspec-1.2.markup.draft.pdf

Mark proceeded to provide a detailed walk-through of the changes suggested and the rationale provided.

Mark then solicited further feedback.

Till raised a point regarding section 5. He wanted to ensure clarity of the content.

Gary believes the content makes sense, but case study may be useful to provide additional context.

Shane noted case studies could be useful, with questions arising in areas such as 4.1.1.

Mark noted a blog with snippets might be useful.

== Any Other Business ==

There was no other business.
