Contribution model for OpenChain

Goals

- We want members contributing materials to the wiki and project to know what terms will govern the contributions.

- Goals:
  - Encourage wide use
  - Encourage wide distribution
  - Enable modification (For example, enabling a company to take training materials and modifying for their specific company).
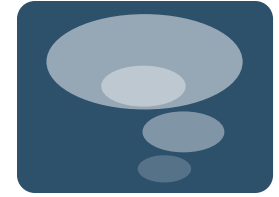

Suggested Licenses

Creative Commons Licenses

- Creative Commons-Public Domain (CC0 1.0 Universal) - http://creativecommons.org/publicdomain/zero/1.0/legalcode

- Creative Commons Attributions (CC BY 4.0) - http://creativecommons.org/licenses/by/4.0/legalcode

- Creative Commons Attribution- ShareAlike 4.0 (CC BY-SA 4.0) - http://creativecommons.org/licenses/by-sa/4.0/legalcode

Another option could be to assign content to Linux Foundation, but a license would still be needed in order to use the materials.
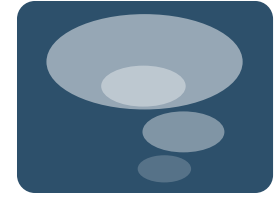

General License Information

Creative Commons-Public Domain (CC0 1.0 Universal)

- This is a dedication to the public domain where the owner of a work waives copyright and moral rights to their work.

- For those jurisdictions that will not recognize the waiver, section 3 provides for license fallback.
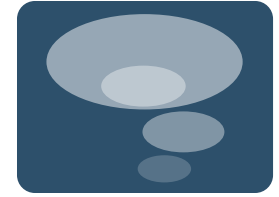

Creative Commons Attribution (CC BY 4.0)

Creative Commons Description

- From Creative Commons: "This license lets others distribute, remix, tweak, and build upon your work, even commercially, as long as they credit you for the original creation. This is the most accommodating of licenses offered. Recommended for maximum dissemination and use of licensed materials."
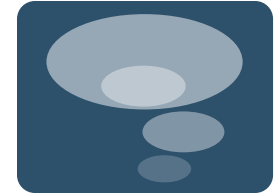

Creative Commons Attribution-ShareAlike 4.0 (CC BY-SA 4.0)

Creative Commons Description

- From Creative Commons – "This license lets others remix, tweak, and build upon your work even for commercial purposes, as long as they credit you and license their new creations under the identical terms. This license is often compared to "copyleft" free and open source software licenses…"
