

SPDX Lite

OpenChain project Japan workgroup

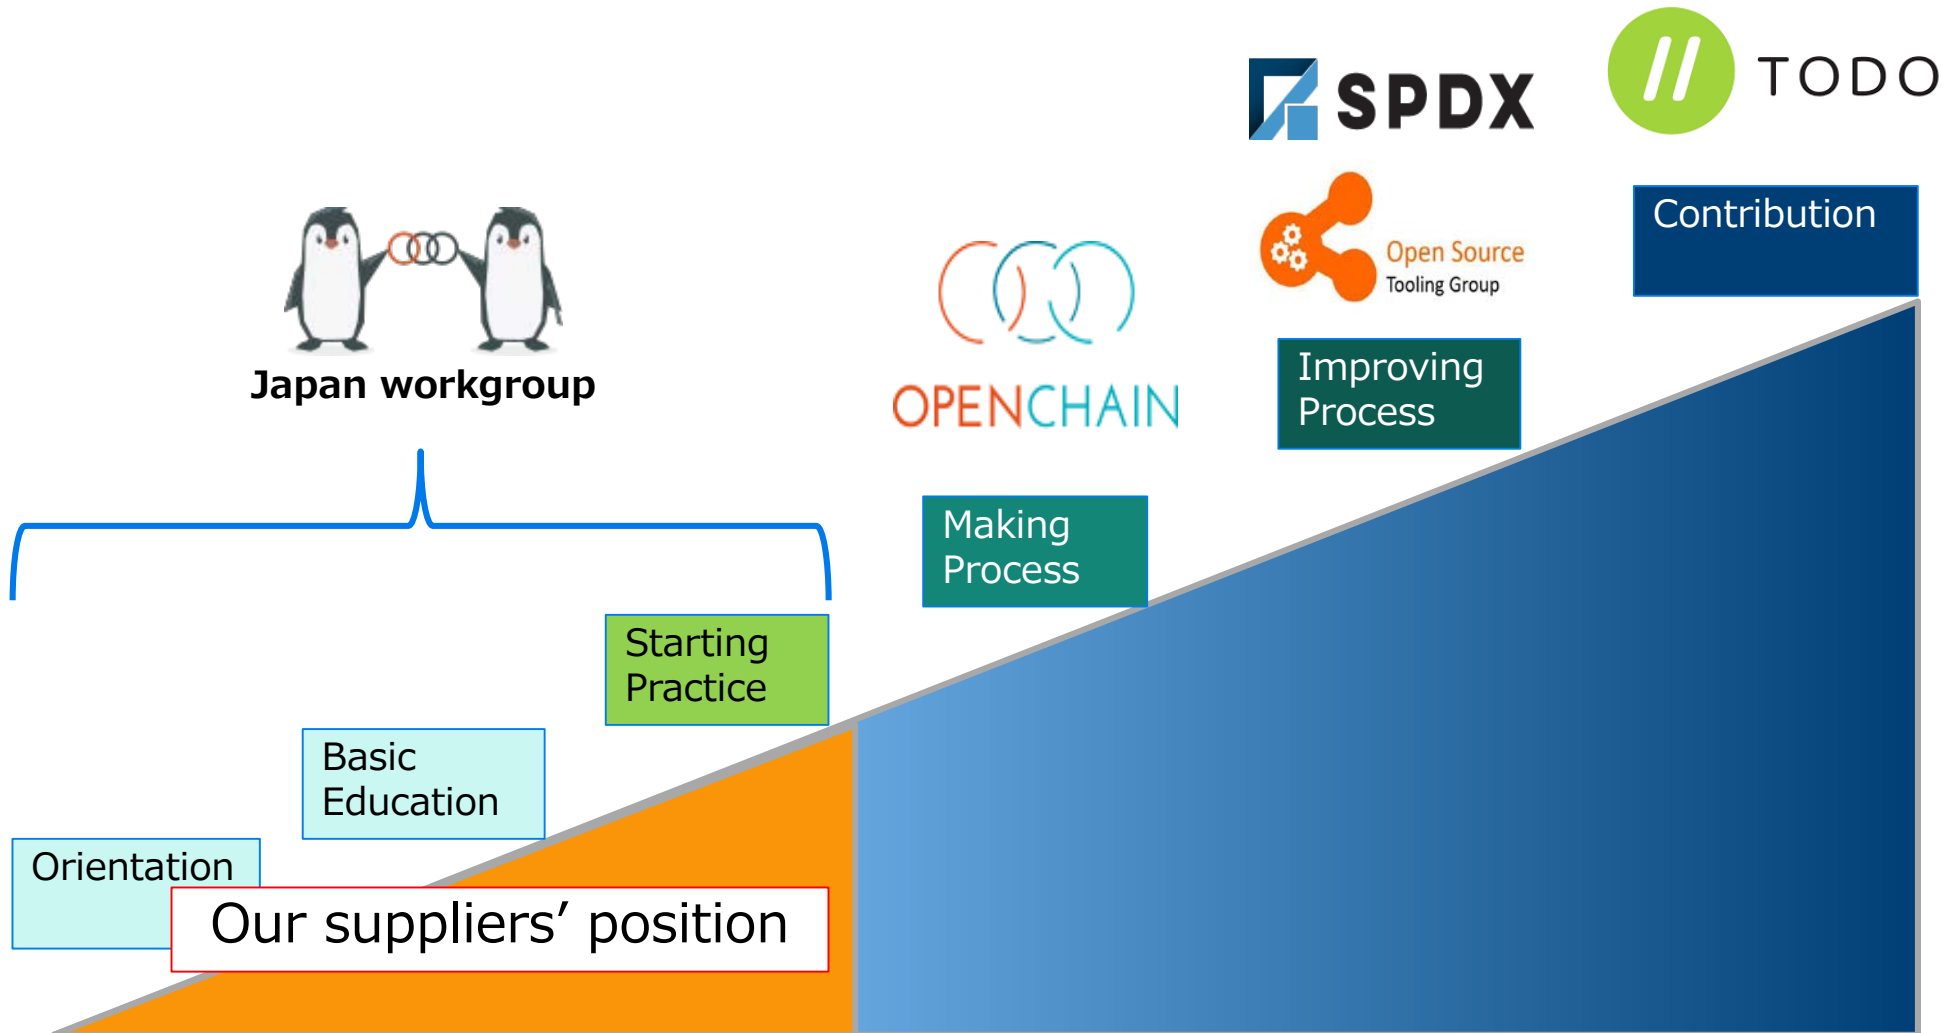

Background of SPDX Lite

- Issue in actual business
 - We do not receive OSS license information from our suppliers
- Why can't suppliers give the information?
 - They do not know OSS license (compliance)
 - They cannot use tools to generate/evaluate the information
- Who are our suppliers?
 - Hardware vendors
 - ODM vendors
 - SoC vendors
 - Their software partners
 - They are in Japan and Asia

Growing model and activity

Growing model and activity

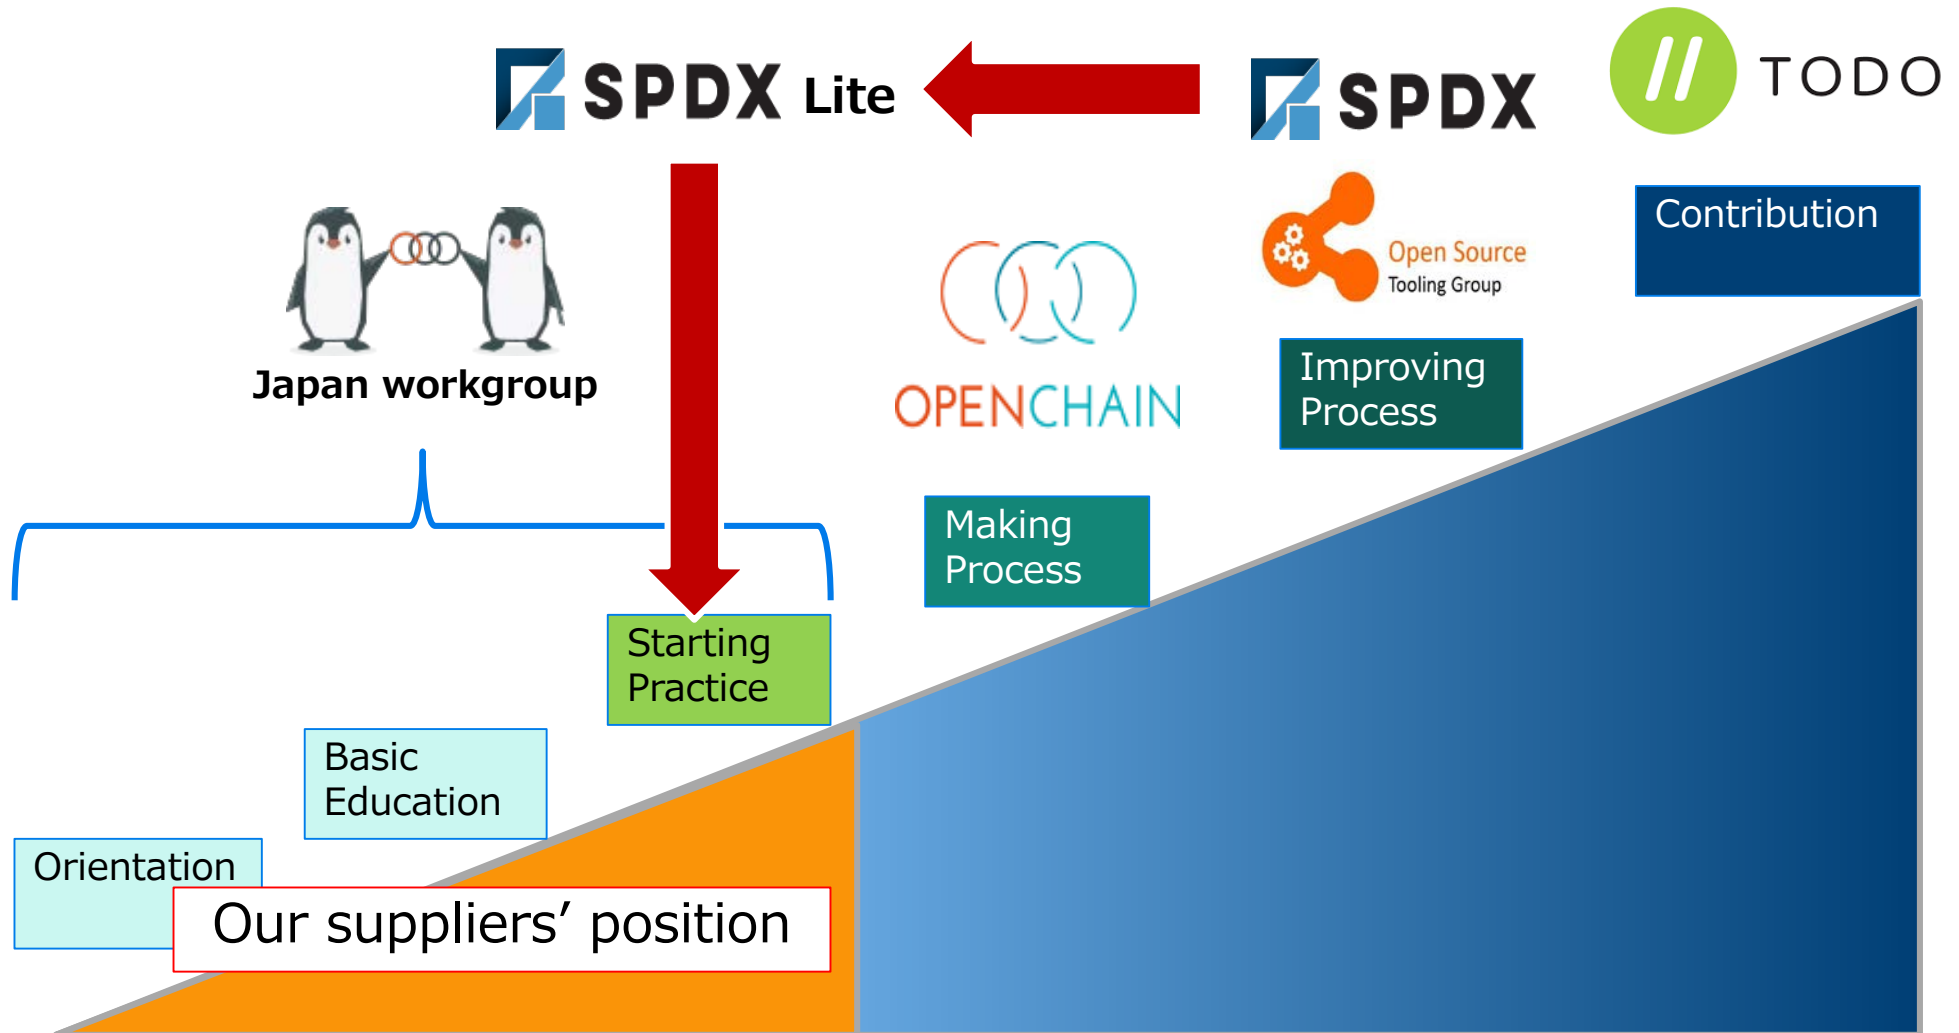

Proposal of SPDX Lite

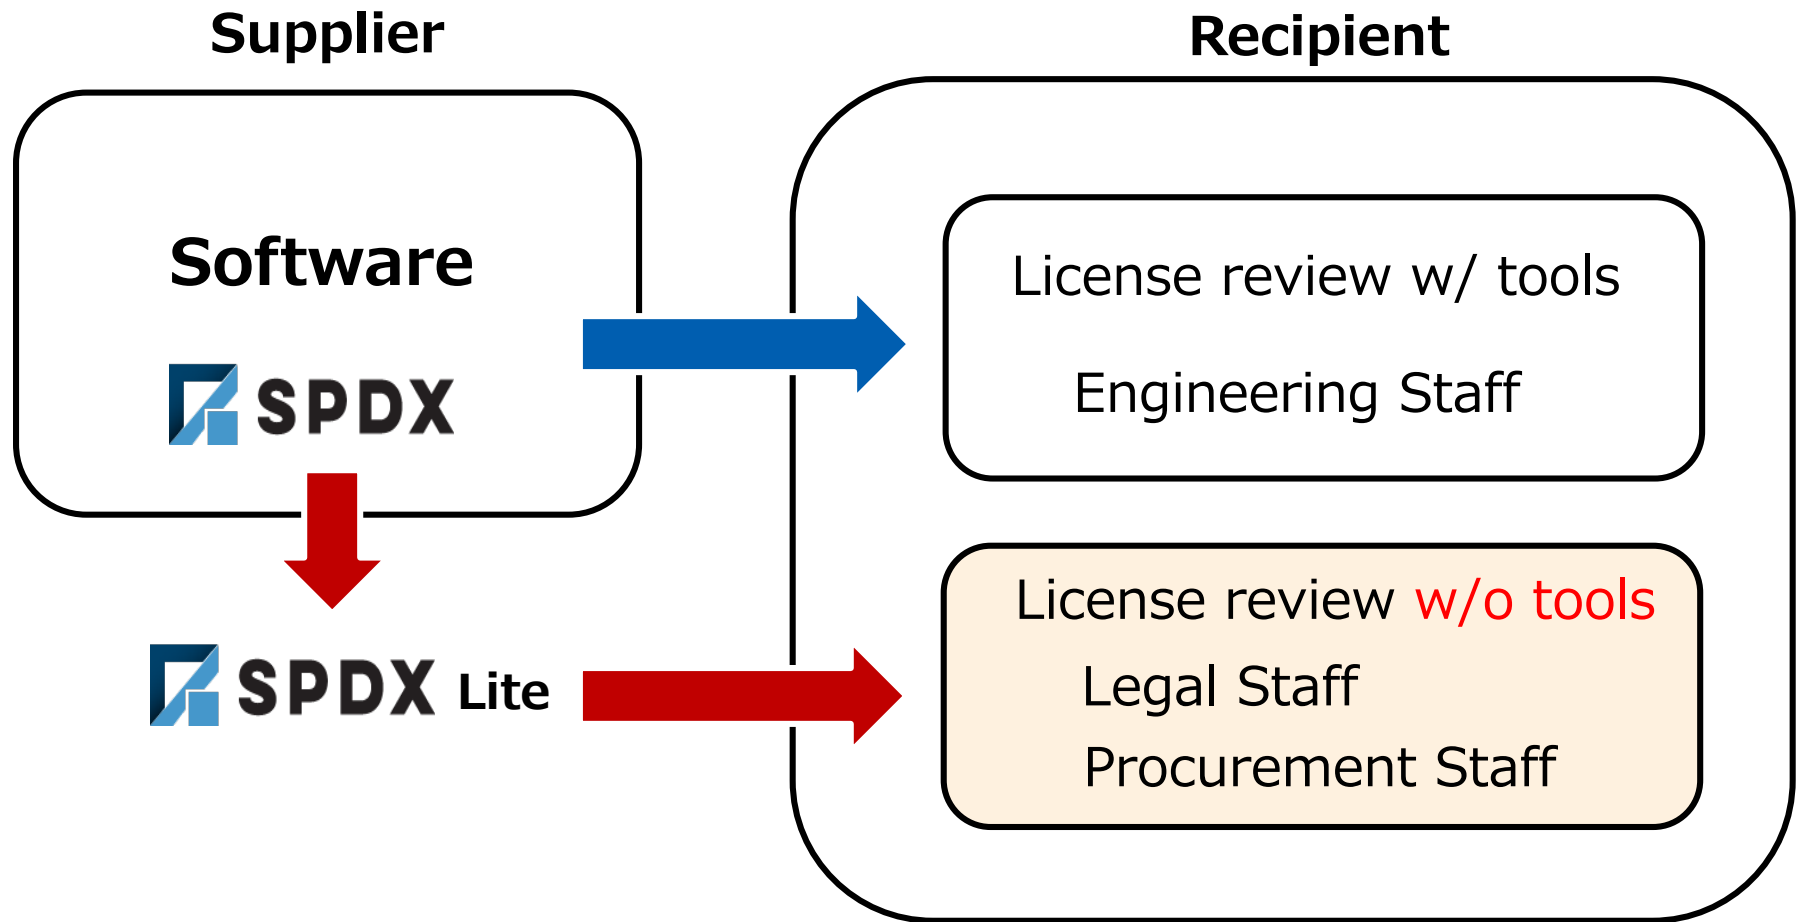

SPDX Lite:

- Is the subset of the SPDX specification ([Compatibility](#))
- Is the minimum requirement by automotive and consumer electronics industries ([Minimum workload](#))
- Can be manually created without special tools ([Easy to create](#))
- Has been proved by actual business ([Industry oriented](#))

Scenario #1: for unskilled suppliers

Scenario #2: for non engineering staff
